

DAILY FUTURES

Monday 16th February 2015

Currencies – EUR, GBP, USD

There are 0 new orders for today.

Entries:

Exits:

The colour coding we are currently using is as follows:

Amended orders or stops

Retained Orders or stops – no change

New working orders

Immediate action required

Short Sell

OPEN POSITIONS:

ROLLOVERS: Code Contract ACTION Action NEW Expiry

Rollover needs to occur because the contract expires on a specified date and needs to be either sold or settled. To Roll a contract over is actually a misnomer - the process is to sell the current contract at market value and buying the next contract at market value.

Rollover

STOPS: Code Contract OLD ACTION NEW EXPIRY

Amended

Brent Crude Oil	BC	LCOJ5-Apr 15	54.06	Amend	55.22	16-03-2015
Gasoil	GO	FPH5-Mar 15	536.2	Amend	545.8	12-03-2015

For those who wish to use CFD's over the Futures Contracts to reduce their trade risk, the following CFD's are available:

Brent Crude Oil	OILUKAPR15		54.06	Amend	55.22	12-03-2015
Gasoil	GASOILMAR15		536.2	Amend	545.8	10-03-2015

Retained

Wheat	W	ZWH5-Mar 15	512.6	Retain	512.6	27-02-2015
-------	---	-------------	-------	--------	-------	------------

For those who wish to use CFD's over the Futures Contracts to reduce their trade risk, the following CFD's are available:

Wheat	WHEATMAR15	513.2	Retain	513.2	25-02-2015
-------	------------	-------	--------	-------	------------

Amended

Retained

For those who wish to use CFD's over the Futures Contracts to reduce their trade risk, the following CFD's are available:

NEW ORDERS:

<i>Name</i>	<i>Code</i>	<i>Contract</i>	<i>Direction</i>	<i>Entry</i>	<i>Stop Loss</i>	<i>Expiry</i>
-------------	-------------	-----------------	------------------	--------------	------------------	---------------

Trade Risk and Margin

We have been including the Trade Risk in the charts for people to be able to judge the comfortable Position size to fit with their trade risk parameters.

How to read this and adapt to your individual circumstances - the number of CFD's shown is equivalent to the Futures Contract Size. Calculate your own trade risk as a ratio of the posted Contract Trade risk and adjust the number of CFD's accordingly

Name	Code	Contract	# of CFD's	Trade Risk	Margin
-------------	-------------	-----------------	-------------------	-------------------	---------------

To clear up any confusion over the OIL CFD's OILUK represents Brent Crude (British North Sea Oil and its contract code "LCO" is for London Crude Oil) and OILUS represents Nymex Light Sweet Crude (West Texas Intermediate known as both CL & WTI).

The Futures Contract for Heating Oil was renamed from Heating Oil to NY Harbour ULSD, the Code for this remains the same though - HO. The CFD remains the same name. There has been some confusion over this change.
