## OPEN POSITIONS:

**ROLLOVERS: Code Contract OLD ACTION NEW EXPIRY**

Rollover needs to occur because the contract expires on a specified date and needs to be either sold or settled. To Roll a contract over is actually a misnomer - the process is to sell the current contract at market value and buying the next contract at market value.

**STOPS: Code Contract OLD ACTION NEW EXPIRY**

To clear up any confusion over the OIL CFD's OILUK represents Brent Crude (British North Sea Oil and its contract code "LCO" is for London Crude Oil) and OILUS represents Nymex Light Sweet Crude (West Texas Intermediate known as both CL & WTI).

Gasoil was recently renamed (for reasons which are obscure) to "Low Sulphur Gasoil" - we will continue to refer to this instrument as Gasoil

### **Trade Risk and Margin**

We have been including the Trade Risk in the charts for people to be able to judge the comfortable Position size to fit with their trade risk parameters.

How to read this and adapt to your individual circumstances - the number of CFD's shown is equivalent to the Futures Contract Size. Calculate your own trade risk as a ratio of the posted Contract Trade risk and adjust the number of CFD's accordingly
