

Week Ending 25th May 2012

There are a couple of new opportunities for the Futures Market in the coming week, after some settling from the previous 2 weeks. There were some major reversals during the week on the commodities market, we may need to observe for a few weeks to allow opportunities to develop.

I believe the name “Rollover” is a misnomer, because you do not roll anything over – the rollover is selling the existing contract at market and buying the new contract at market.

With the contracts highlighted this week, simply open the platform, click on the box with the + in it, and then on the right hand side of the screen, click on the Blue cross, this closes the position at market when the Futures markets open.

Then enter orders for the new contracts at market, and place the same stops as were on the original contract.

We have now placed the expiry date next to each position so it is easier to keep track of upcoming rollovers, and are highlighting the ones which need immediate attention.

Have a great week all
