

Week Ending 30th March 2012

The futures markets pulled back a little last week

I believe the name “Rollover” is a misnomer, because you do not roll anything over – the rollover is selling the existing contract at market and buying the new contract at market.

With the contracts highlighted this week, simply open the platform, click on the box with the + in it, and then on the right hand side of the screen, click on the Blue cross, this closes the position at market when the Futures markets open.

Then enter orders for the new contracts at market, and place the same stops as were on the original contract.

We have now placed the expiry date next to each position so it is easier to keep track of upcoming rollovers, and are highlighting the ones which need immediate attention.

Have a great week all
