

Week Ending 24<sup>th</sup> February 2012

New York Stock Exchange has shown some strength this week with some strong upward movements in many areas. The trailing stops are working well with most of the open positions having their stops above the entry – locking in profit or nearly at the entry – reducing the trade risk in the position.

There were 6 entries last week

While I moved it from the Orders to Open Positions last week, I forgot to mention Qualcomm in the entries for the week, last week

Have a great week all
