

# DAILY FUTURES

## Monday 4th January 2016

Currencies – EUR, GBP, USD

---

There were 0 entry and 0 exits

There are 0 new order for Daily Futures.

Coming into the Christmas period, the market liquidity shrinks dramatically which can cause increased volatility, with this in mind, we are ceasing the search for new orders until after New Year and will resume on 3rd January 2016.

In the interim period there are no open positions, so we look forward to working with you throughout 2016, see you 3rd January 2016, enjoy your break.

---

### Entries:

### Exits:

The colour coding we are currently using is as follows:

Amended orders or stops

Retained Orders or stops – no change

New working orders

Immediate action required

Short Sell

## OPEN POSITIONS:

**ROLLOVERS: Code      Contract    ACTION    Action      NEW      Expiry**

Rollover needs to occur because the contract expires on a specified date and needs to be either sold or settled. To Roll a contract over is actually a misnomer - the process is to sell the current contract at market value and buying the next contract at market value.

**STOPS:              Code              Contract    OLD              ACTION    NEW              EXPIRY**

Amended

Retained

For those who wish to use CFD's over the Futures Contracts to reduce their trade risk, the following CFD's are available:

## **WORKING ORDERS:**

### **CANCELLED ORDERS:**

Name:      Code      Contract      Direction      Entry      Stop Loss      Expiry

### **Amended**

### **Retained**

## **NEW ORDERS:**

*Name      Code      Contract      Order      Entry      Stop Loss      Expiry*

For those who wish to use CFD's over the Futures Contracts to reduce their trade risk, the following CFD's are available:

### **Trade Risk and Margin**

We have been including the Trade Risk in the charts for people to be able to judge the comfortable Position size to fit with their trade risk parameters.

How to read this and adapt to your individual circumstances - the number of CFD's shown is equivalent to the Futures Contract Size. Calculate your own trade risk as a ratio of the posted Contract Trade risk and adjust the number of CFD's accordingly

**Name      Code      Contract      # of CFD's      Trade Risk      Margin**

To clear up any confusion over the OIL CFD's OILUK represents Brent Crude (British North Sea Oil and its contract code "LCO" is for London Crude Oil) and OILUS represents Nymex Light Sweet Crude (West Texas Intermediate known as both CL & WTI).

The Futures Contract for Heating Oil was renamed from Heating Oil to NY Harbour ULSD, the Code for this remains the same though - HO. The CFD remains the same name. There has been some confusion over this change.

## **CHARTS**
