Amended orders or stops

Retained Orders or stops – no change

New working orders

Immediate action required

Short Sell

Change Contract Specifications

OPEN POSITIONS:

ROLLOVERS: Code Contract ACTION Action NEW Expiry

Rollover needs to occur because the contract expires on a specified date and needs to be either sold or settled. To Roll a contract over is actually a misnomer - the process is to sell the current contract at market value and buying the next contract at market value.

STOPS: Code Contract OLD ACTION NEW EXPIRY

Name Code Contract Direction Entry Stop Loss Expiry

To clear up any confusion over the OIL CFD's OILUK represents Brent Crude (British North Sea Oil and its contract code "LCO" is for London Crude Oil) and OILUS represents Nymex Light Sweet Crude (West Texas Intermediate known as both CL & WTI).

For some reason the Futures Contract for Heating Oil was renamed from Heating Oil to NY Harbour ULSD, the Code for this remains the same though - HO. The CFD remains the same name. There has been some confusion over this change.
