The colour coding we are currently using is as follows:

Amended orders or stops
Retained Orders or stops – no change
New working orders
Immediate action required
Short Sell
Change Contract Specifications

OPEN POSITIONS:

ROLLOVERS: Code   Contract *ACTION*   *Action*   *NEW*   Expiry*

Rollover needs to occur because the contract expires on a specified date and needs to be either sold or settled. To Roll a contract over is actually a misnomer - the process is to sell the current contract at market value and buying the next contract at market value.

Trade Risk and Margin

We have been including the Trade Risk in the charts for people to be able to judge the comfortable Position size to fit with their trade risk parameters.

How to read this and adapt to your individual circumstances - the number of CFD's shown is equivalent to the Futures Contract Size. Calculate your own trade risk as a ratio of the posted Contract Trade risk and adjust the number of CFD's accordingly

Name	Code	Contract	# of CFD's	Trade Risk	Margin
Brent Crude	BC	LCOF5-Jan 15	1 Contract	USD $4,150	USD $3000
		OILUKJAN15	1,000 Barrels		USD $1,584
Crude Oil	BC	CLF4-Jan 15	1 Contract	USD $4,190	USD $3,740
		OIKUSJAN15	1000 Barrels		USD $1,511
Heating Oil	HO	HOZ4-Dec 14	1 Contract	USD $4,452	USD $3,795
		HEATINGOILDEC15	42,000 Gallons		USD $2,027

To clear up any confusion over the OIL CFD's OILUK represents Brent Crude (British North Sea Oil and its contract code "LCO" is for London Crude Oil) and OILUS represents Nymex Light Sweet Crude (West Texas Intermediate known as both CL & WTI).

The Futures Contract for Heating Oil was renamed from Heating Oil to NY Harbour ULSD, the Code for this remains the same though - HO. The CFD remains the same name. There has been some confusion over this change.
