Gasoil was recently renamed (for reasons which are obscure) to "Low Sulphur Gasoil" - we will continue to refer to this instrument as Gasoil

Trade Risk and Margin

We have been including the Trade Risk in the charts for people to be able to judge the comfortable Position size to fit with their trade risk parameters.

How to read this and adapt to your individual circumstances - the number of CFD's shown is equivalent to the Futures Contract Size. Calculate your own trade risk as a ratio of the posted Contract Trade risk and adjust the number of CFD's accordingly
